I. PURPOSE OF THE RFQ

Due to COVID-19 and its effects on our economic landscape, local businesses have been facing significant impacts which threaten the overall quality-of-place investment our community has made for many years. The Alliance for Economic Development of Oklahoma City (The Alliance) and the Greater Oklahoma City Chamber are working with the City of Oklahoma City to provide tools to assist small businesses affected by the pandemic through the Oklahoma City Rescue Program using American Rescue Plan Act funding.

II. CONSULTANT SERVICES DESIRED

Oklahoma City Rescue Program supports façade improvements and other exterior building improvements. These improvements have a \$30,000 cap and will be reimbursed to the small business owner after submission of paid invoice. Some of these services may require engineering/architectural services.

Small business owners may also apply for technical assistance help. It is our intent to select a pool of qualified professionals to provide engineering/architectural services based on the needs of the individual businesses needing assistance. Individual consulting assignments may be limited in scope in order to provide assistance to as many small businesses as possible. For each assignment, consultants will enter into an agreement with the Alliance to provide an approved scope of services and will be paid directly by the Alliance. These engineering/architectural services will be provided under that program with a not to exceed amount of \$15,000.

Consultants/firms responding to this RFQ may propose to provide one or more of the services listed below and/or other related services.

- Architectural
- Civil Engineering
- Mechanical/Plumbing Engineering
- Electrical Engineering
- Structural Engineering
- Topographical Survey
